

Science

Exploring Science Course

The course is a foundation for Physics, Chemistry & Biology Standard Grade Courses in S3

The topics covered in S1 are:

Environment & Genetic Variation

Solids, Liquids & Gases

Energy and Electricity

Forces

Cells and Reproduction

Acids & Chemical Reactions

Each topic includes the opportunity to undertake experimental work, research activities, presentations, creative learning and problem solving tasks.

Assessment

Formative assessment is used throughout the course followed by a summative test at the end of each topic. Marks are recorded for knowledge and understanding. Problem solving abilities and practical skills are also assessed during each unit.
